

## README

### SMM Project-2

**Author : Anil Kuncham / Ravi Shankar**

### NAIVE BAYE'S MODEL IMPLEMENTATION

The **classifier\_NB.py** will take newline separated raw tweets and classify them approximately and writes the output to **conf\_related\_classified\_tweets.txt** with available temporal information appended to the tweet.

#### **Input :**

python classifier\_NB.py <filename>

#### **Output**

Generated in the file. conf\_related\_classified\_tweets.txt and predicted\_tweets.txt
